**Date: February 26 - 28, 2026**

**Location:**

- **Oude Vismijn, Ghent Belgium**
- **Orsi Academy, Proefhoevestraat 12, 9090 Melle (BE)**

Dear partner,

We are delighted to invite you to the third edition of Orsi Innotech's leading event in surgical innovation: Surgical AI & Telesurgery Days, scheduled to take place from February 26 to 28, 2026.

Following two successful and inspiring editions, Orsi Innotech continues to lead the way in AI-assisted surgical skill assessment and serves as a key development center for cutting-edge surgical technologies. Once again, we look forward to welcoming a diverse and international group of medical professionals, engineers and industry leaders to explore the latest innovations in surgical AI.

We invite you to be an integral part of this growing event. Your continued support plays a vital role in shaping the future of surgery and in ensuring the ongoing success of this unique gathering.

We look forward to welcoming you (back) as a valued sponsor of the Surgical AI & Telesurgery Days 2026.

Warm regards,

*Prof. Dr. Alexandre Mottrie*  
CEO Orsi Academy

*Dr. Ir. Pieter De Backer*  
Surgical Artificial Intelligence Lead, Orsi Academy

## **Why Orsi Innotech?**

Orsi Innotech is the pioneering innovation hub of Orsi Academy, located near Ghent, Belgium. We're all about bringing the latest innovations – like artificial intelligence (AI), augmented reality (AR) and computer vision – into the world of minimally invasive surgery.

From real-time organ recognition to smart surgical phase detection and live anonymization, our tools are designed to support surgeons before, during, and after every procedure. The goal? Safer surgeries and better patient outcomes.

In collaboration with leading institutions and tech partners, Orsi Innotech continuously pushes the boundaries of surgical innovation. The Surgical AI & Telesurgery Days are a testament to this vision, bringing together clinicians, researchers, and industry leaders to explore the frontiers of AI in surgery.

## **General information**

Surgical AI & Telesurgery Days is a three-day event that blends the best of both worlds: high-level insights and hands-on experience. The first two days follow a conference format at Oude Vismijn with expert talks, panel discussions, live AI-assisted surgeries and an exhibition room focused on interaction with the attendees.

On day three, the action moves to Orsi Academy, where participants dive into hands-on workshops and interactive training sessions. It's where cutting-edge innovation meets real-world surgical practice.

## Why attend?

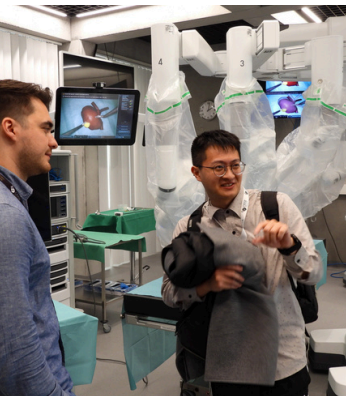

Surgical AI & Telesurgery Days isn't just another medical conference. As a sponsor or partner, you're not only supporting innovation, you're becoming part of the story.

Partnering with us means:

- Targeted exposure to a highly engaged audience of surgeons, researchers, engineers and medtech innovators.
- Brand presence during live AI-assisted surgeries: a rare opportunity to align with real-time clinical innovation.
- Direct networking in both conference and hands-on workshop settings.

## Topics

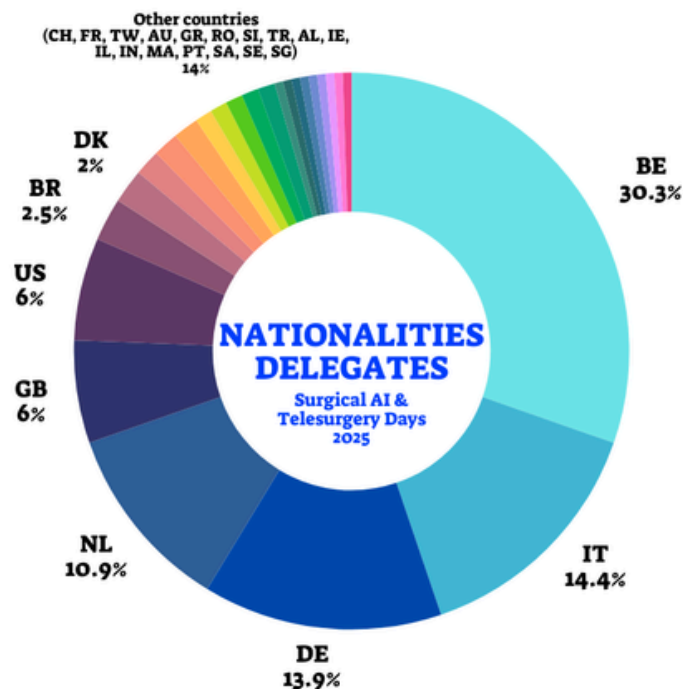

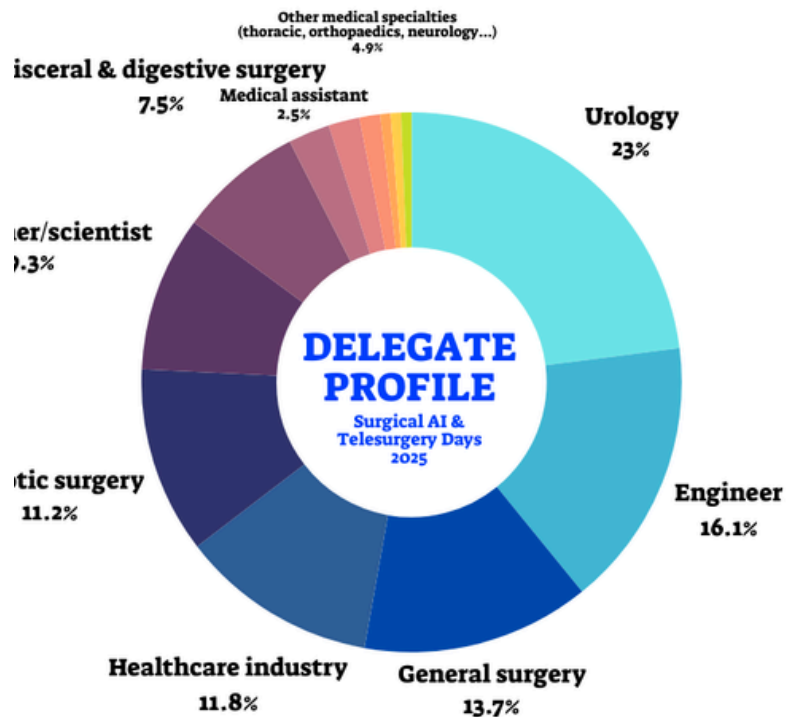

- AI in surgical decision-making & workflow guidance
- Augmented reality & real-time visualisation in the OR
- Telesurgery, teleproctoring & remote collaboration
- Surgical training in the era of AI & telesurgery
- What can we learn from AI in other industries?
- Ethics, privacy & regulation in surgical AI
