12 [e.g., 1 Jan 2020]

13 **How to Use This Template**

14 *This template shows the manuscript structure that can be used in an original article: Abstract, Keywords,*
15 *Introduction, Methods, Results, Discussion, Declarations and References. Please note that each part has a*
16 *corresponding style, which authors should follow. Please note that the fonts in gray show writing requirements. For*
17 *any questions, you may contact the editorialoffice@aisjournal.net.*

18 **Abstract**

19 [*Suggestions: No more than 250 words. No citations. Define abbreviations at their first mention.*]

20 **Aim:** The purpose of this study, i.e., the reason why authors write this manuscript.

21 **Methods:** The detailed methods applied to this study, including description of patients, materials, software,
22 experimental apparatus, experiment object (human or animals), etc.

23 **Results:** The main findings of this study, including conclusive description, analysis, and comparison with
24 other related research results, etc.

25 **Conclusion:** The conclusion of this study. We suggest that authors may highlight its significance,
26 emphasize the value of this study and state expectation on future studies that may need to be carried out.

27 **Keywords:** Tumor microenvironments, *Foxp3*, transforming growth factor- β 1, *Helicobacter pylori*,
28 Notch, DNA, high performance liquid chromatography

29 [*Please suggest 3-8 keywords which can be used for describing the content of the manuscript and will enable the*
30 *full text of the manuscript to be searchable online.*]

52 **Abstract**

53 [*Suggestions: No more than 250 words. No citations. Define abbreviations at their first mention.*]

54 Abstract is a brief summary of an article, which helps the readers quickly ascertain the paper's main content.
55 In this part, authors may mention writing purpose, experimental methods, results and their significance in
56 this research field, etc.

57 **Keywords:** Tumor microenvironments, *Foxp3*, transforming growth factor- β 1, *Helicobacter pylori*,
58 Notch, DNA, high performance liquid chromatography

59 [*Please suggest 3-8 keywords which can be used for describing the content of the manuscript and will enable the*
60 *full text of the manuscript to be searchable online.*]
